Overall Length:

9.110 inches

Pressure Rating:

6000.000 pounds per square inch

Special Features:

Industrial sensor bi-directional, machined steel body, electroless nickel coating; brass/stainless steel internal components; used with aggressive fluids; flow capacity: 10-100 usgpm mineral oil, 85 usgpm water and water/oil emulsion, seals: all "o" rings and bonded seals are epdm, pressure couplings: epdm internal/external seals, sps cartridge valve: epdm seals, ports: 1 5/8-12unf-2b

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T145-b
