Overall Length:

3.370 inches

Overall Height:

1.620 inches

Overall Width:

2.500 inches

Current Type:

Ac

Frequency Rating:

Between 50.0 hertz and 60.0 hertz

End Application:

Electric water heater, model 17753, 6 gallon capacity, 9 kw, 440 volt, 3 phase, 60 hz

Voltage Rating:

120.0 volts

Mounting Method:

Hole

Special Features:

Item name per manufacturer: liquid level control series resistance sensor (low water detect logic) ; terminations: 1/4" x .032" male fast-ons; mounting: 4-.141" diameter holes; operating temp: 0 degc to 70 degc; sensing voltage: 20 vac, rms; output rating: 5 amp. Resistive at 120 vac 100ma at 5 vdc min. Load current

Media For Which Designed:

Water

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
