End Application:

A/c receiver

Maximum Tempurature Rating:

300.0 degrees fahrenheit

Maximum Working Pressure:

500.0 pounds per square inch

Furnished Data:

Liquid level

Data Furnishing Method:

Float ball

Special Features:

Suresite visual liquid level, type b, inverted, high impact shock resistant; 3 ball float; 1" ips and 600 lb flat face flanges; flag position shall be "c"; indication length is 49; indicator usable with liquids in the viscosity range 0.75 to 1.1; all connections flanged or union o-ring; tapered pipe threads not permitted

Material:

Stainless steel

Media For Which Designed:

Water and oil

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A43400
