End Application:

Tachograph kit p/n rcsk 19523

Current Rating:

50.000 milliamperes

Voltage In Volts And Current Type:

24.0 dc

Special Features:

Output frequency range: 0 to 100khz; corrosion proof brass fittings; riveted tamper proof construction; universally designed with interchangeable keys; 7/8 x 18" or 22mm threads; operating temp: minus 40 degrees celsius to 150 degrees celsius (polytetrafluoroethylene cable), minus 40 degrees celsius to 80 degrees celsius(pvc polytetrafluoroethylene cable)

Material:

Aluminum alloy

General Description:

Rotary transducer is designed to be transmission mounted or driven by a rotating flexible cable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
