Maximum Temperature Rating:

225.0 degrees fahrenheit

Maximum Working Pressure:

200.0 pounds per square inch

Special Features:

Medium pressure-double window, threaded-rotator-paddlewheel indicator used for clear media to enhance flow indication-any direction; matl glass-temp soda lime, seals-neoprene viton, rotator/flapper-delrin

Material:

Copper alloy

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A43400
