**Width:**

110.0 millimeters

**Length:**

241.0 millimeters

**Presentation Type:**

Digital display

**Scale Range:**

-1.0/+40.0 bar single indicator degree celsius

**Case Material:**

Plastic and aluminum

**Product Name:**

Guided wave radar level transmitter

**Special Features:**

Time domain reflectometry (tdr); m20 x 1.5 adapter conduit; sealing o-ring ethylene propylene; coaxial probe; flange dn100, pn16 in 316l sst; no hazardous location certifications

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A533y0
