**Current Type:**

Ac

**Dc Voltage Rating:**

Between 105.0 volts and 125.0 volts

**Frequency Rating:**

Between 50.0 hertz and 400.0 hertz

**Presentation Type:**

Digital display

**Scale Range:**

+0.1/+1399.0 degrees celsius single indicator degree celsius

**Phase:**

Single

**Special Features:**

Designed for type k thermocouple material; chromel-alumel; 0 degrees equals 0.017 mv input and 1399 degrees equals 55.890 mv input; accuracy is plus or minus 3 degrees at 0 to 70 degrees c.; pin a is al connection; pin b is cr connection; pin c and d is 115 vac input; pin f is positive mv input; pin g is negative mv input; pins j and k are for external zeroing of the scale

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A533y0
