Thread Direction:

Right-hand

Mounting Method:

Shoulder w/threaded holes

Flow Control Device:

Disk

End Application:

Combat systems support system

Usage Design:

Control temperature valve

Thermostat Type:

Bellows

Spring Operated Pressure Relief:

Not provided

Special Features:

Adjustable opening temp from 70 degrees f to 110 degrees f, 10.0 ft long capillary tube, 36.0 in. Lg copper bulb, liquid expansion type

Thread Size And Series/type Designator:

0.250-20 unc

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T121-c
