Overall Length:

18.000 inches

Overall Height:

8.000 inches

Overall Width:

11.000 inches

Case Material:

Aluminum

Accessory Components And Quantity:

1 thermometer, 2 test lead thermocouple, 1 test lead resistance thermometer, 5 test leads adapter

Scale Calibration:

Calibrated to 12 and 24v resistance thermometers, calibrated to iron constantan chromel and alumel thermocouples

Installation Design:

Portable

Scale Range:

22.50 to 28.50 v, 11.25 to 14.25 v

Scale Type:

Eccentric

Measurement Type:

Potentiometer circuit and millivolt circuit

Scale Accuracy:

0.5 v

Scale Length:

3.500 inches

Indicating Point Type:

Single

Case Type:

Fungusproof w/hinged lid and carrying case w/handle

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T179-b
