Overall Length:

5.500 inches

Stem Length:

5.000 inches

Design Type:

Fluctuating

Scale Type:

Concentric dial

Scale Smallest Increment:

2.0 degrees fahrenheit

Scale Inscription/background Color:

Black marking on silver background

Scale Accuracy Rating:

1 degrees f

Scale Adjustment Variation:

Adjustable over entire range

Features Provided:

Protective glass/plastic

Scale Measurement Range:

+0.000/+220.000 degrees fahrenheit

Product Name:

Thermometer self indicating bimetallic 0 to 220 degrees fahrenheit

Special Features:

With pocket clip; used in testing shell eggs and other food products by personnel of the veterinary service

Material:

Stainless steel meter case

Surface Treatment:

Passivate meter case

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A27600
