Voltage In Volts And Current Type:

115.0 ac

Product Name:

Dewpointer; dew point meter

Special Features:

range ambient less than 10 degrees f to -80 degrees f; pressure ratio 1.0 to 1.5; can be powered by vac or battery

Functional Description:

Zmeasures dewpoint or moisture saturation point of air or gases; hanp pump creates a partial vacuum and cooling in radium-ion chamber; at the dew point a fog forms and is visible on the indicator which is a resistance type thermometer

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
