Overall Length:

18.000 inches

Overall Height:

6.000 inches

Overall Width:

14.000 inches

Product Name:

Flow leakage tester assembly

Special Features:

Completely portable; requires no external power source; consists of various gages, flow control, tubing, a sensing device, a 70 psi oxygen inlet and various hardware; contained in an aluminum case with a handle; at ground level the tester checks for leakage of the c and helmet assembly, the helmet only and helmet regulator flow; inlet pressure gage 0-100 psi; leakage gage 0 to 90 liters per minute; helmet pressure gage 1 to 5 inches of water, c pressure gage 1 to 6 pounds per square inch

Functional Description:

Used by maintenance personnel to preflight check full pressure flying outfit type ttu-150/e

Reference Data And Literature:

T.O. 33d2-10-44-1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A23900
