Maximum Operating Pressure:

350.0 pounds per square inch

Zero Adjuster:

Provided

Scale Range:

+1.4/+14.6 pounds and +3.0/+30.0 inches

Receptacle Type:

Well

Scale Smallest Increment:

0.1 pounds and 0.1 inches

Connection Type:

Threaded

Connection Facility Type:

Internal

Connection Location:

Top

Parallax Eliminating Feature:

Not provided

Indicating Liquid For Which Designed:

Mercury

Indicating Liquid:

Not provided

Control Valve:

Not provided

Equalizing Valve:

Not provided

Mounting Provision For Which Designed:

Surface panel

Thread Size And Series/type Designator:

1/4 npt

Reference Number Differentiating Characteristics:

W/cres wetted parts, w/wells rasied 5-3/16 in. To the 29 in. Scale graduation, w/barometric adjustment range 30 in. To 27 in.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T179-d
