Overall Length:

12.375 inches

Overall Height:

5.375 inches

Overall Width:

12.875 inches

Case Material:

Aluminum

Installation Design:

Portable

Scale Type:

Dial

Measurement Type:

Millivolt circuit

Case Type:

Carrying case w/handle

Special Features:

Used to calibrate total temperature indicators on aircraft, uses a series of potentionometers to establish millivolt inputs

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T179-b
