Thread Direction:

Right-hand

Mounting Method:

Flange

Flow Control Device:

By-pass

Usage Design:

Control engine coolant temp

Thermostat Type:

Solid expansion

Opening Temperature Rating:

Between 177.0 degrees fahrenheit and 182.0 degrees fahrenheit

Operating Temperature Rating:

Between 177.0 degrees fahrenheit and 182.0 degrees fahrenheit

Spring Operated Pressure Relief:

Not provided

Product Name:

Thermostats, flow control, for 10 to 500 h.P., liquid-cooled internal combustion engines

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T121-c
