**Scale Marking And Surface Finish:**

Numerals nonluminous

**Current Type:**

Dc

**Dc Voltage Rating:**

28.0 volts

**Scale Range:**

+0.1/+150.0 degrees fahrenheit single indicator single scale

**Electrical Connection Quantity:**

1

**Illumination Color Generation Method:**

Incandescence

**Features Provided:**

Resistor type voltage adapter

**Special Features:**

Scale calibration: 10 deg; scale name: supply air degree f; voltage adapter resistance in ohms: 1.44; nonluminous scale marking and color: numerals, matte white

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A533y0
