Overall Length:

7.000 inches

Overall Height:

5.500 inches

Overall Width:

9.250 inches

Voltage Rating In Volts:

115.0 ac

Measurement Type:

Digital

Display Type:

Light emitting diode

Display Digit Quantity:

4

Measurement Range:

+0.0/+400.0 degrees celsius

Product Name:

Portable digital thermometer

Environmental Attribute Code:

Non-mercury alternative - medical products - thermometers

Special Features:

Temp range differential-reads temp difference between 2 probes; resolution 0 to 60 degrees c 1/10th degree, resolution 0 to 400 degrees c one degree; accuracy 0.2% of full scale +/- 1 digit; readout bright red led digits 0.4 inch high, readable at 20 feet; works with any type t (copper/constantan) thermocouple; three probe inputs, switch selectable; recorder output 4 v max, linearized, drives all chart recorders; weigght 7 lbs; portable item with handle; has ultra stable dc amplifier that eliminates both calibration drift and the effect of thermocouple resistance

Style Designator:

Portable, bench

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A27600
