Overall Length:

2.340 inches

Outside Diameter:

0.120 inches

Unthreaded Mounting Hole Diameter:

0.498 inches

Operating Temperature Range:

-65.0/+250.0 degrees fahrenheit

End Application:

P/N2-75-002-4101

Unit Type:

Protective tube

Mounting Facility Type And Quantity:

1 straight

Case Type:

Cylindrical and hermetically sealed

Distance Across Wrenching Surface Flats:

2.340 inches

Accommodated Contact Type And Quantity:

2 wire lead

Special Features:

Environmental requirements; -65 degrees f. To 250 degrees f.; 15.5 psia to 0.44 psia; vibration 5 to 2000 hz; 10g load limit; thermistor, negative coefficient; 15k ohms at 0 degrees c.; resistance change 3.9 percent per 25 degrees c.; 8000 hrs or 5 yr operating time; 28 awg, type e leads 12-16 inches long

Material:

Steel comp 304 protective tube

Style Designator:

Transmitter, 24v dc

Terminal Type And Quantity:

2 insulated wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A27600
