Overall Length:

15.500 inches

Overall Height:

9.000 inches

Overall Width:

12.500 inches

Case Material:

Aluminum alloy

Accessory Components And Quantity:

Thermocouples, iron-constantan, alumel-chromel with harnesses

Installation Design:

Portable

Scale Type:

Horizontal

Measurement Type:

Millivolt circuit

Scale Accuracy:

0.02 degrees c.

Case Type:

Carrying case w/handle

Special Features:

Used to calibrate thermocouple systems, indicators, and thermocouples; powered by 115 vac, 60 hz or 12 vdc power pack, digital display; zero drift correction factor included

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T179-b
