**Overall Length:**

15.000 inches

**Overall Height:**

10.500 inches

**Overall Width:**

13.625 inches

**Current Type:**

Ac

**Ac Voltage Rating:**

115.0 volts

**Frequency Rating:**

60.0 hertz

**Information Recorded:**

Any acceptable

**Recording Method:**

Ink pen on recording chart

**Chart Drive Method:**

Electromechanical assembly

**Phase:**

Single

**Special Features:**

Will record any event with millivolt inputs, thermocouple, rdt, etc., 2 pen on 11 inch wide chart, accuracy 0.3 percent, rated temperature 16 to 140 degrees f, chart speed controlable, illuminated face, modular servicing, chart length 122 ft, chart speed 1 in per hour to 30 in per min. Can convert to 220 volt operation, circuit burn-out option, 24 thermocouple inputs

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T206-a
