Overall Length:

14.500 inches

Overall Height:

12.500 inches

Overall Width:

9.375 inches

Case Material:

Aluminum alloy

Accessory Components And Quantity:

Thermocouples, types k, t, j, millivolts, syncchro, ohms and megohms

Installation Design:

Portable

Scale Type:

Horizontal

Measurement Type:

Millivolt circuit

Scale Accuracy:

0.02 degrees c.

Case Type:

Carrying case w/handle

Special Features:

Used to calibrate thermocouple systems, indicators, and thermocouples; powered by 115 vac, 60-400 hz, nul balance dial digital display; zero drift correction factor included

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T179-b
