Overall Length:

36.000 inches

Operating Temperature Range:

-190.0/+800.0 degrees celsius

End Application:

M-37 engine test stand for the tf34-ge-100

Mounting Facility Type And Quantity:

1 threaded stem

Accommodated Wire Awg Size:

20

Immersion Length:

1.410 inches

Product Name:

Probe, sample tube, temperature oil tank

Special Features:

J-type thermocouple probe that adapts into the m-37 test stand sump

Functional Description:

Monitor sump oil temperature in the test stand

Material Specification:

St+470b assn standard all material responses thermocouple wire

Terminal Type And Quantity:

2 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A27600
