Operating Temperature Range:

-58.0/+302.0 degrees fahrenheit

Special Features:

Universal temp probe; provides direct temp conversion of 1 mv per degree; resolution 0.1 degree, range selection internal jumpers; sensitivity type 1 mv per 0.1 deg; accuracy 2 to 3 degrees c; maximum voltage 350 vdc or peak ac, probe tip to circuit low; power internal disposable battery, 1000 hours continuous use; control power on-off switch only

Terminal Type And Quantity:

1 plug

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A27600
