Mounting Method:

Flange

End Application:

Used on a itt lawler mod. No. Sfstemperature control valve

Usage Design:

Thermostat control valve cycling

Thermostat Type:

Bellows

Opening Temperature Rating:

125.0 degrees fahrenheit

Operating Temperature Rating:

Between 125.0 degrees fahrenheit and 210.0 degrees fahrenheit

Spring Operated Pressure Relief:

Not provided

Special Features:

Consists of actuator bulb capillary tube and bellows

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T121-c
