Product Name:

Air flow cooling monitor unit

Special Features:

A self contained portable item housed in a case with carrying handles

Functional Description:

A welded case containing 2 open loop air circuits each having an inlet and outlet connected together by a duct which provides plumbing and mounting for a low pressure sensing switch and a high temperature sensing switch

General Description:

Item includes p/n 400-15260-1 box assembly, p/n 400-15260-101 case, p/n 400-15272-1 and -3 tubes, p/n b105-120 temperature switch, p/n ms27212-1-6 terminal board, p/n 12h3k614 pressure switch and various hardware, connectors, terminals, hoses, clamps and wires

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:
