Current Type:

Ac

Ac Voltage Rating:

115.0 volts

Frequency Rating:

Between 50.0 hertz and 60.0 hertz

Presentation Type:

Digital display

Electrical Connection Quantity:

1

Display Type:

Light emitting diode

Special Features:

IEEE-488 output; display 4 1/2 digit with decimal point and polarity indication; temp range 45 to 110 degrees f; power supply input 110/115/230 vac, 60 watts max; power supply output 30 vdc capable of powering 6 transmitters simultaneously; 6 channel capacity with manual and automatic selection; includes alarm set points; display various pressures per settings on the indicator; used with the heise 715t type transmitters

Supplementary Features:

Manufacturers name: multi-channel receiver

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A533y0
