Product Name:

Air jet temperature system

Functional Description:

Item provides a rapidly moving stream of air that is temperature controlled; permits fast and uniform control of temperature with accuracy and repeatability; item provides a method to control the temperature of electronic components and circuit boards

General Description:

Provides rapidly moving air stream that is temperature controlled; permits fast, uniform control of temperature, with accuracy and repeatability; provides method to control temperature of electronic components and circuit boards

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
