Overall Length:

9.750 inches

Overall Diameter:

2.000 inches

Calibration Type:

Deg celsius

Instrument Calibration Range:

Tin freeze temp. 231.9681 degrees c

Special Features:

Item includes a well for the thermometer under test; quartz sealed envelope; it contains an inert gas at a pressure of 1 standard atmosphere

at the freezing temperature

Functional Description:

Uses defining and reference fixed points based on the freezing temp of metals to calibrate thermometers

Shape:

Rectangular

Supplementary Features:

Manufacturers name: fixed point reference cell

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T263-b
