Unit Type:

Shielded

Product Name:

Temperature rake, compressor discharge

Special Features:

Cable is mineral insulated type k30 gage chromel/alumel with ungrounded 304 sst sheathing 0.062 by 0.010 wall thickness; rake consists of a stainless steel single piece rake body and mounting pad with five total temperature sensors; thermocouple wire type k with stainless steel overbraid; five temperature reading are averaged and a single mating connector is provided for interface; probe installed in instrumentation port in the compressor rear frame with gasket and four mounting bolts bolts are safety wired after being torque; measures temperature across the entire width of the air flow path

Functional Description:

Determines the temperature profile of the compressor discharge

Reference Data And Literature:

2j-tf39-3 and 2j-tf39-4

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A27600
