Current Type:

Ac

Ac Voltage Rating:

Between 110.0 volts and 120.0 volts

Electrical Connection Quantity:

1

Accuracy Rating:

1.0 percent single indicator single scale

Product Name:

Spinning rotor friction gage

Special Features:

Display range 10⁻² torr (mm hg) to 10⁻⁷ torr (mm hg); viscosity type gage, measuring pressure by sensing the rate of deceleration of a spinning ball that has been levitated and made to spin inside the vacuum; serves as a pressure calibration transfer standard; includes IEEE-48 interface and built in rechargeable battery for back up power supply

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A533y0
