Overall Length:

36.000 inches

Operating Temperature Range:

-150.0/+1260.0 degrees celsius

Immersion Length:

6.000 inches

Product Name:

Thermocouple probe

Special Features:

86 inch long by 1/8 inch diameter sheath made of inconel; lead wire 3 feet long; insulation to withstand temps up to 380 degrees c continually; inside the sheath the wires are insulated with magnesium oxide but are grounded to the sheath at the junction

Functional Description:

Intended for use with the fluke 2190a, 2160 and 2170 series digital thermometers

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A27600
