End Application:

H-53 helicopter

Product Name:

Temperature controller

Special Features:

Light weight self contained unit; power 115 vac , 50/60 hz; maximum load 2400 watts; control type analog with deviation meter; temperature range 100 to 600 degrees f; setpoint single turn pot 270 degrees rotation

Functional Description:

Used to control heating of the h-53 main rotor blade for composite repair

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A23900
