Case Material:

Aluminum

Scale Range:

+1.0/+999.0 microns

Scale Name:

Vacuum

Scale Type:

Meter dial

Mounting Method:

Panel

Special Features:

Mpower 95.0 to 140.0 vac; 50/60 hz; input current 0.14 amps; operating temp 32 to 158 degrees f; 0.5 inch high led; chassis size 1/16 inch by 10 3/4inch by 12 5/8 inches; vacuum instrument televac mp2a-1-2pcr-al-p

Functional Description:

Used to monitor the vacuum maintained while the gg177 accelerometer is being filled with damping fluid

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T179-b
