Current Type:

Ac

Ac Voltage Rating:

115.0 volts

Frequency Rating:

60.0 hertz

Operating Range:

+0.0/+150.0 degrees fahrenheit and +0.0/+100.0 percent

Information Recorded:

Relative humidity and temperature

Graduation Unit:

0.100 degrees and 1.000 percent

Phase:

Single

Special Features:

The system consists of four groups; remote sensors; remote interface; computer interface; computer; remote sensors consist of 5 ea temperature and humidity probes in a common unit with a remote interface to condition the signal; another interface is used prior to the computer; the computer can then display or record the information in several formats

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T206-a
