Current Type:

Dc

Mounting Device Quantity:

1

Actuation Method:

Diaphragm

Voltage Rating:

0.1 volts output and 5.1 volts output

Measurement Range:

+0.0/+250.0 pounds pressure per square inch

Special Features:

Increases in pressure cause a slight rounding of the diaphragm which decreases the capacitances, this capacitance is converted to a highly accurate linear dc electrical signal

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T179-e
