Mounting Type:

Bench

Special Features:

Mfg name is hydraulic gage calibrator; operating temperature range 10 to 35 degrees c

Functional Description:

Hydraulic pressure generator/controller is a stand alone, pressure generating and controlling componene intended to be used as the pressure source and means of pressure adjustment in hydraulic calibration and test systems; reference pressure monitor intended to accurately measure gas or liquid pressure in a wide variety of pressure calibration, measurement and test application

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T179-x
