General Description:

Can be adapted to any pressurized system; gas or annydrous fluid flows through the dessicant, through a porous disk fliter; pressure rating
- 300psig; burst pressure - 750psig; -20 to 160 degrees f temperature rating; 1/4 in. Tube x 45 degrees flare connector; all metal parts
wetted by operating fluid are aluminum, brass and steel
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
