Electrical Resistance Temperature Indicator - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/6685-01-474-1723

Case Material:
Glass
Special Features:
Vglobe temperature sensor is designed to measure radiant energy in an area; consists of a black globe, a glass thermistor, eeprom and
the housing; calibrated at 3-points; operating temp minus 30 to 70 degrees c; 2 inch black globe
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
