Current Type:

Dc

Operating Temperature Range:

-57.0/+85.0 degrees celsius

End Application:

E8 airplane

Physical Form:

Rectangular

Voltage Rating:

28.0 volts

Actuation Type:

Thermocouple

Special Features:

Zmonitors temperature air cooling avionics equipment, provides analog signal as a function of cooling effect to a pair of connector pins, acc p/m 5% full scale, mtbf 50, 000, mounts on 4in od circular duct, manufacturers name heat detector

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A514m0
