Width:

3.780 inches

Current Type:

Dc

Dc Voltage Rating:

Between 12.0 volts and 36.0 volts

Depth:

2.909 inches

Presentation Type:

Digital display

Scale Range:

-1999.0/+9999.0 degrees fahrenheit 2nd indicator single scale

Individual Marking:

Inouts 1 and 2; degrees c or f

Electrical Connection Quantity:

2

Mounting Facility Type And Quantity:

1 clamp

Display Type:

Light emitting diode

Display Digit Quantity:

4

Accuracy Rating:

0.5 degrees celsius all indicators degree celsius

Product Name:

Temperature/process monitor

Special Features:

Display color is user selectable, red, green, amber; compatible with following thermocouples and rtds - j, k, t, e, r, s, b, c, n, l and pt rtds with and alpha of 0.00385 or 0.00392. Also will accept voltage input of 0 to 100 mv, 0 to 1 v and 0 to 10 vdc and a current input of 0 to 20ma. Weight 0.65lbs. Option -c24 is isolated rs-323 and rs-485 300 to 19.2k baud output.

Height:

1.890 inches

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A533y0
