Maximum Operating Pressure:

10.7 pounds per square inch

Mounting Type:

Carrying case

Accessory Components And Quantity:

Series 475-fm manometer 1, a303static pressure tips 2, 9 ft 3/8 inch id rubber tube 2, 66-6 cf pitot tube 1, a397drill 1, a532 air veloci type 1, slide chart 1, instruction sheet h-11-1

Usage Design:

Maintain air protective cover eglin an/fps-85 radar

Zero Adjuster:

Provided

Connection Type:

Threaded

Connection Facility Type:

External

Connection Location:

Top

Product Name:

475-av air velocity kit

Special Features:

Handheld, air velocity gage, rugged plastic case, .5 in 3.5 digit display, safely used in hazardous location, class1, div 1, grp a, b, c, d t4, accuracy p/m.5% , operating temp 0-140 degrees f, req 9v battery, 2 barbed connection 1/8 or 16 inch id tubing, h 7.5 inch, w 3 inch, 0.5 inch liq crystal, 10.8 ounces

Functional Description:

Field calibration low pressure pneumatic systems i.E.Hvac, clean rooms.Vacumm systems

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T179-d
