End Application:

Pmel

Case Type:

Hinged lid carrying case w/handle

Criticality Code Justification:

Feat

Scale Measurement Range:

-200.000/+661.000 degrees celsius

Product Name:

25w standard platinum resistance thermometer, working standard

Special Features:

Item critical due to application; sensitivi type 0.1w per deg. C; quartz glass protective sheath with four sensor wires

Functional Description:

Thermometer is a reference standard used by pml to support temperaturecalibrations

Precious Material:

Gold and platinum and silver

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A27600
