Overall Length:

1.600 inches

Overall Height:

6.700 inches

Overall Width:

1.700 inches

Product Name:

Thermometer infrared dot laser sighting

Special Features:

Circle or dot laser sighting, range -20 to 420 degrees c; resolution 1 degree c/1 degree f; repeatability +1 degree c; emissivi type 0.95 fixed; spectral response 6-14mm; optical field of view d: s=8.1; response time 500ms; storage ambient -20 to 5 degrees c less than 90% of humidity; 0 to 50 degree c less than 80% fo humidity; ambient temperature +5 degrees c, calibrated by black body emissivity at 0.95; power: 9 volt battery, included; in-process temperature measurement, fire and safety, plastics molding, marine and rv, food safety; not to be used to measure body temperature; for industridal and scientific purposes

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
