Usage Design:

Controls pressure using dhi's patented, positive shut-off pressure control

Product Name:

Pressure controller

Special Features:

Positive shut-off control is recognized for its high reliability, very wide dynamic range and minimal gas consumption; reliability is because of the use of low power solenoid valves with less than 1 mm displacement used at very low operating frequency; delivered pressure uncertainty of p/m 0.01 percent of reading from 1 000 psi to 30 psi p/m 0.003 psi under 30 psi

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T179-e
