AeroBase Group

End Application:

Spacelift range systems (slrs)

Product Name:

Sensor, humidity

Special Features:

Corrects for temperature and calculates true relative humidity, provides humidity and temperature outputs with accuracy of porm 2 percent, output is 9600 baud; rs232 ascii text compatible via serial port, power is supplied via the serial port, temperature rangeis -30 degrees to +85 degrees celcius, storeage temperature -40 to +125 degrees celcius, operating humidity range is 0 to 100 percent, soldering temperature limit +250 degree celcius (520 degees farenheit) for 10 seconds, response time of 50 sec in slow moving air, style is four pin sip with 0.100 in lead spacing

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
