End Application:

Sensor list, lpd17

Usage Design:

Air, sea water

Measurement Range:

+0.0/+10.0 inches of water

Product Name:

Transducer, pressure differential

Special Features:

The differential pressure transducer shall operate in a 24v, 4-20ma current loop. The transducer shall be powered from the 28v loop voltage.

Current output shall be linear with respect to the measured differential pressure. Maximum design temp 200 degs f

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T179-e
