Overall Length:

4.000 inches

Overall Height:

1.500 inches

Overall Width:

3.050 inches

End Application:

Naval applications

Accessory Components And Quantity:

Lcd display 1; alarm visual over and under for temp and humidity only 2; calibration software 1; auto off 1; aa batteries 3

Information Recorded:

Relative humidity and temperature and dew point temperature

Recording Method:

Electrolytic discharge on chemically treated paper

Chart Drive Method:

Synchronous drive

Product Name:

Dvth temperature humidity logger with display

Special Features:

Dataview dvth is a self-contained precision instrument for recording the temperature, relative humidity of the surrounding environment; the unit computes and display the dw point temperature; 3 different screen user can switch between includes a graphics screen

Supplementary Features:

Includes power save mode which still allows use of all features of the supcolog software to communicate with the logger; atuo exit to power down mode

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T206-a
