Operating Temperature Range:

-33.0 to 43.0 degrees fahrenheit

Maximum Voltage Rating In Volts:

220.00 ac

Current Rating In Amps:

6.00

Operating Range:

Alarm settings: low 33 deg. F and high 43 deg. F

Power Source:

External

Phase:

Single

Special Features:

Display type: 3 digit led and ranges from neg. 99 deg. To 999 deg.; material: 304 stainless steel; mounts with key hole slots on back-standard top, side, and bottom optional; probe length is 10 inches standard with 20 inches optional and dry contacts are available for remote monitoring system; shipping weight is 6.00 pounds and operating weight is 3.00 pounds; operating temp of freezer setting is a high temp of 15 deg. F.

Frequency In Hertz:

50.0 and 60.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A31700
