Current Type:

Dc

End Application:

C141 aircraft

Voltage Rating:

10.0 volts

Special Features:

Operate with an airborne signal data recording set which measures flight parameters relating to aircraft structural loads. Polarity, for airspeed with increasing the output voltage of the airspeed transducer becomes more positive. For altitude with decreasing pressure, the output voltage of the altitude transducer becomes more positive

Fsc Application Data:

Computer, flight director

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

T145-b
