Mounting Type:

Portable

Power Source:

Electric motor

Generator Voltage Range In Volts And Current Type Accommodated:

+0.0/+115.0 ac

Phase:

Single

Special Features:

Measures resistance and air flow rates of demand type regulators, hi and lo pressure, 25 in lg, 10.75 in wide 7.5 in high, do not use for oxygen systems

Frequency In Hertz:

60.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T361-f
